

Equi-NIZE[®]

Micronized Robank Race Concentrate

- Robank Equi-**NIZE**[®] Race Concentrate is a scientifically formulated concentrate feed designed for horses where adding straight grains is desired to maintain required energy levels and a constant protein, vitamin and mineral source is preferred.
- Robank Equi-**NIZE**[®] Race Concentrate utilizes the latest technology of micronizing to cook the grains and change the starch structure in the grain, this combined with quality ingredients makes a feed that is highly palatable and digestible to the horse.
- Robank Equi-**NIZE**[®] Race Concentrate contains a highly fortified mixing pellet that has all the vitamins and trace minerals as well as digestive aids Yea-sacc[®] and Bio-mos[®] included in the feed. This ensures maximum utilization of these important nutrients by the horse by eliminating separation of them in the feed.
- Robank Equi-**NIZE**[®] Race Concentrate uses beet pulp, a super fibre which is a soluble fibre and highly digestible, it is a good source of digestible energy for the horse, in addition high quality protein sources are utilized (Equi-**NIZE**[®] Lupins, Equi-**NIZE**[®] Tic Beans) which assist in the repair of connective tissues and muscle after strenuous exercise.
- No additional vitamins & minerals to be added unless advised by nutritionist or veterinarian.

INGREDIENTS:

Robank's Micronized Mixer Pellets (*which includes Vitamins & Minerals, Di-Calcium Phosphate, Calcium Carbonate, Yea-Sacc[®], Bio-Mos[®], Natural Vitamin E, Sel-Plex[®], Lysine, Methionine*) Equi-**NIZE**[®] Lupin Flakes, Equi-**NIZE**[®] Tic Bean Flakes, Equi-**NIZE**[®] Barley Flakes, Beet Pulp, Molofos Gold, Canola/Soyabean Oil, Flavouring

Equi-NIZE[®]

Micronized Robank Race Concentrate

FEEDING DIRECTIONS

Robank Equinize Race Concentrate can be fed at the following rate:
1 to 2.5kg per day. Add Equi-NIZE straight grains for extra energy
and to maintain body condition

As this feed is a concentrate do not exceed 2.5kg per day.

Not suitable for ponies or horses in light exercise.

Feed in conjunction with good quality free choice hay and an electrolyte such as
“Quench[®]” should be added to help maintain correct hydration.

TYPICAL ANALYSIS - Fresh Weight

Energy	12.3 MJ/Kg
